

William Pearman

Curriculum Vitae

Education

PhD, Genetics / Marine Biology — University of Otago, Dunedin, New Zealand (2023) Seaweed population genomics and microbiome structure.

Master of Natural Science (Distinction), Molecular Ecology — Massey University, Auckland, New Zealand (2020)

Bachelor of Natural Science, Molecular Ecology — Massey University, Auckland, New Zealand (2018)

Positions

Research Fellow — University of Auckland Host-microbe evolution, using simulations. Molecular ecology across whole genome sequencing, population genomics, eDNA, microbial ecology, and nanopore sequencing of recalcitrant species.

Skills

- R — data visualization, analysis, eDNA/metabarcoding analysis, and simulation
- Command line bioinformatics — genome assembly, variant calling, metagenomic analysis
- Project management
- Scientific publishing

Service & Outreach

- Peer review: Journal of Phycology, Journal of Biogeography, Molecular Ecology, Molecular Ecology Resources
- Committee Member — University of Auckland Faculty of Science Research Fellow Society
- Organizer — University of Auckland MicroGroup
- Invited speaker, science communication — All Saints Church, Birkenhead
